If you're having trouble connecting to the Call of Duty: Modern Warfare, you should first check Call of Duty's Modern Warfare Server Status. If you could not connect to before, it's possible that the network setting might have changed or the profile is corrupted. To fix this, you should remove (or "Forget") the eNET Work Connection, and then reconnect from an eNET Work Connection. For more information, see Fix Wi-Fi connection issues on Windows - Microsoft Support.
