Apostinhas em Gols; the Guinness Complete Guide to Getting Started

O que é uma Apostinha em Gols?

Apostas de gols, também entendidas como over/under, é uma ótima opção para quem não quer adivinhar o resultado final de uma partida. A principal coisa que você precisa adivinhar é o número total de gols marcados naquela partida específica. É para você decidir se o resultado final compreende um número de gols que é maior ou menor do que um determinado número.

How does Apostinha em Gols work?

To place a corner bet, you need to decide on a number, and bet on whether the total number of goals in the game will be more or less than that number. And that's pretty much it! Just remember, if you bet on under, there are more goals scored in the match, and you will lose your bet.

Example 1: Betting on the match having less than 2 goals will win if less than two goals are scored, and you lose if there are more than two goals in the match. If you bet on more than 2.5 goals, you will win if there are three or more goals, and you will lose if less than two goals are scored. And sometimes you wish to wager on even more precise numbers, and you can make a better bet by lowering the betting goal. By doing so, you get better odds; this time, you choose either team A win first-half goal x Team B win first-half with a team A bet, or you can choose your own bet and if you make bets on the correct scoreline, so much luck the final result! But let's stay on top of it so you don't get surprised by sudden, terrible news to hear you'll find below a table with some examples for half-time
