

# holdem manager ggpoker

It's not currently known exactly how Pokerstars, and other poker sites, detect VPNs. It's likely to be one of the three following methods. However, their website says: "And our VPN servers IP change when a connection is made from one..."

5 Best VPN methods include:  
Blacklisting known VPN IP addresses: Pokerstars maintains the list of IP addresses associated with VPN servers. If you attempt to connect to the website using one of these IP addresses, you will be blocked! How to bypass Pokey's vnet detection -
