On this website, you can play heads-up (two person) no-limit Texas Hold'em. The blinds are 50 and 100 chips and 0, £ the stack sizes are 200 big blinds (i.e., 20,000 chips).

Slumbot is one of the top no-limit poker bots in the 0, £ world. The 2024 version of Slumbot placed second in the Annual Computer Poker Competition, the premier event for poker software.

The 0, £ baseline statistics compare how you did to how Slumbot would have done with your cards in your seat. A positive 0, £ value for baseline earnings mean you did better than Slumbot would have done against itself given your cards and sitting 0, £ in your seat.

Here's an example with a single hand. First Slumbot deals out cards for the board (let's say AhTd4c9s3h), 0, £ the button (let's say AdKh) and the big blind (let's say TsTc). Then Slumbot plays itself on these cards.

Let's 0, £ say that the players get all-in (since they both have strong hands) Tj T\* BT

Now 0, £ you get to play Slumbot on these same cards. Let's suppose you're the button. Perhaps you put in 8,000 chips 0, £ on the early streets but manage to fold to a large bet on the river. Your outcome is -8,000 for 0, £ this hand.

Your baseline outcome is how much better (or worse) you did than Slumbot did against itself. Your baseline outcome 0, £ here is +12,000 which is the difference between -8,000 and -20,000.

Your baseline statistics should better reflect the skill with which 0, £

you play. They eliminate much of the luck due to getting good or bad cards by measuring your relative performance 0, £ to another player playing with the same cards.
