<p>Been playing this app for a few days now, and I've noticed something with the algorithm whether it's intentional or not is quite noticeably annoying. If you like casino games and playing for an otherwise free app it's cool, but if you're like me and like to manually choose spin and stop as you like to play- there's a problem.

I've noticed over and over when you want the wheel on any of the games to stop it deliberately won't . ESP when it's on a big win. Once I've noticed this I've paid closer and closer attention and this is pretty much 100% of the time when you were going to hit a major prize. I spent the last two days testing my theory in it happened over and over and over again. It'll allow you to hit some of the minor jackpots but when it was going to hit a grand prize, a wheel or a "random" jackpot is selected- a wheel will stop and bump to the next lesser winning amount... or the button doesn't respond at all but will a moment after the initial button tap.</p>

<p>Update- now the stop button will go seconds before light up and allows you only to hit at certain times. Like I said it's all for fun BUT once you notice you're getting jipped on big wins it's frustrating. Gotten really glitchy and seems more obvious the algorithms are making the game less and less fun.</p>
