

blaze blackjack

We see that the owner of the website is using a service to hide his/her identity. This may be because the owner does not want to get spammed. However, it also makes it difficult to identify the real owner of the website. As a result, websites hiding their identity get a slightly lower score.

This company seems to be offering gambling-related services such as poker, roulette, blackjack, and lotteries. The laws around gambling differ per country. In most countries, you need to receive a certificate or license in order to operate a gambling website. To prevent that you are being scammed we always advise using a gambling site certified by your government. You can learn more about Safe Online Gambling & Betting on our blog.

Cloudflare is a worldwide distributed Content Delivery Network (CDN) platform. Cloudflare does not provide web hosting services and is primarily concerned with web performance and security. It is also a Google Cloud Platform and IBM Cloud partner and therefore shares a lot of mutual reputable customers with both companies. One of Cloudflare's most popular services is its Domain Name Service (DNS) which comes with built-in security measures such as DDoS-blocker and DNSSEC, as well as a Web Application Firewall (WAF). The platform's reputation over the years made it the go-to for a lot of credible organizations and platforms, including ScamAdvisor; but like with everything else on the internet, it is still prone to misuse by scammers.
