

blitz roulette

European roulette, benefiting from its lack of a double zero pocket, generally boasts

House Edge provided
Players with in slightly improving odds of long-term success; Win
The key difference between American roulette and European roulette is the house edge. The European version is significantly better for players, at 2.70%. This means that for every \$100 spent at the table, the player can expect to lose \$2.75 from European roulette. American vs. European Roulette : Which Should You Play? casino-betmg.com/blog
