A Cbet methodology, also known as "continuous bid adjustment," is a technique reused in search engine optimization (SEO) and pay-per-click (PPC), advertising. It involves continuously adjusting bid cost on specific keywords or search terms in order to improve the visibility or performance of these organic search results. The Cbet methodology is based on the idea of constantly monitoring and analyzing data, such as click-through rates (CTR), conversion rates, and cost per click (CPC), to make informed decisions about bid adjustment. This approach allows businesses and marketers to optimize

campaigns. The Cbet methodology can be applied to a variety of advertising platforms, including Google Ads, Bing Ads, and social media ads. It is the dynamic ongoing process that requires a deep understanding from the target audience, the competitive "landscapes" or an constantly changing algorithm of search engines. In summary, the Cbet methodology is a powerful tool for any business or marketer looking to improve their online advertising performance and achieve their marketing goals.
