

fiz casino mobile

Mobile gaming is easy with Ruby Fortune. Whether using the app or your browser, the mobile site structure is the same. There's a pop-up menu at the bottom of the screen which makes it easy to navigate to different games and sections. Microgaming, which powers the games at Ruby Fortune, has plenty of experience in mobile gaming. The vast majority of the huge gaming menu is available when you want to play on mobile. The software runs really smoothly and the graphics and colors pop even more on the small screen.

For Android or Apple users, you can download the Ruby Fortune Casino App from either the casino, App Store, or Google Play. If you have a different device, or prefer not to download the app at all, the Ruby Fortune site is fully optimized for mobile gaming. We tested out both methods during our Ruby Fortune mobile review, using a variety of different devices, including iPhones, iPads, and Samsung phones. The mobile playability is really good.

Follow our quick step-by-step guide if you want to find out how to play on mobile.
