NetEnt launches new mobile interface for Live Roulette

Enhanced, player-focused UI put players at the centre of the action

NetEnt Live has rolled out a new mobile interface for its Roulette product, significantly elevating the user experience and optimising performance across all screen orientations.

The new design includes a significant revamp of the portrait gameplay, introducing 18 Recent Numbers to improve usability. Landscape features Recent Numbers, while dynamic camera angles and quick access to favourites and statistics are available in both views.

Now showing more immersive streaming in portrait and landscape than any other product on the market, players are presented with an immersive video view at almost 50 percent and 100 percent of the screen, respectively, transporting them to the heart of the game.

Users can also bet exclusively with Racetrack, allowing them to easily and quickly place bets on groups or sections of numbers on the roulette wheel without resetting the main field at the start of every game.

NetEnt Live is committed to continually enhancing our product set with new additions and updates that deliver an unrivalled player experience, said Andres Rengifo, Director of NetEnt Live. With our new Roulette mobile interface, we have once again raised the bar, developing a product that is primed to capitalise on the rapid shift to mobile.
