PALLITE, designer and manufacturer of the popular PIX range of flexible warehouse storage solutions, is expanding the brand range to include PIX SLOTS, to meet the demands of businesses storing small and lightweight products, such as the fashion and beauty industry. PALLITE launched its PIX range over two years ago and has since taken the warehouse industry by storm. An alternative to corrugate pick bins, as well as metal racking, PIX is designed to consolidate pick-faces to create more space in a warehouse, ultimately giving operators a higher yield of SKU density per m2. The difference with PIX is that it overcomes the grievances you face when choosing any of the other solutions in the market and offers a flexible, quick-build, and easy to bespoke solution. What's more, PIX and PIX SLOTS is made from over 85% recycled materials and is 100% recyclable. PIX is quick and easy to build without the need for any tools. A customer recently proved just how quick and easy PIX is to construct without the need for any tools when they had a team of two people build over 9,000 pick-faces in just five hours. It was easy and cost-effective for them to specify bespoke units and benefit from the shortest lead times offered by PALLITE.
