

# market bet

The green zero pockets in roulette are the secret to how online casinos make money. The house takes it winning of that round. This is why most players fear the green zero pockets as they nullify all other bets.

In roulette, the house always has an edge. The green zero and double zero pockets are what give the house its advantage. Most players don't realize that betting on red or black, odd or even, or high or low only pays 1 to 1, including the 0 and 00. Betting on a single number pays 35 to 1, including the 0 and 00. Betting on red or black, odd or even, or high or low pays 1 to 1, including the 0 and 00. Betting on a single number pays 35 to 1, including the 0 and 00. Betting on red or black, odd or even, or high or low pays 1 to 1, including the 0 and 00.
