21+ RESPONSIBLE GAMING

21+ RESPONSIBLE GAMING

At Club388, one of our primary objectives is to ensure a responsible gaming environment. While it is extremely important for us to provide to our players, an online casino experience like no other, that is not enough. Being the providers of a powerful means of entertainment, we also have a duty to prevent under-age individuals from accessing our online casino products.

As an online gaming company aimed at bringing online casino entertainment to Philippine, we fully understand the moral obligations and responsibilities that must be fulfilled by us. Club388 is a completely legal online gaming site, licensed to host online casino games where Philippine players may also play with full sanction of the law. However, it is important to us that youngsters and impressionable minds should not have access to our online gaming platform.

Online casino is including various fun games, but it is also a pursuit that involves money actively changing hands among participants. This requires a level of maturity and level-headedness that younger people may often lack.

The maturity factor also leads to the possibility of under-age individuals spending too much time playing online casino, as compared to players who know when to take a break. Thus, it is important to us that all players registered on Club388 must be of age 21 years or above on the date of registration. This helps us ensure that our online gaming products do not serve to act as a distraction of any sort to those pursuing basic or undergraduate education.

In order to enforce our policy of only allowing players above the age of 21 to play real money and play money casino games on Club388, we have put in some checks in place. Players may thus be requested for proof of age in order to continue. If such a request is received
