We know that most people say they enjoy horror, but there's still a sizeable chunk of the population somewhere in between who don't like it.

Today's psychological thriller and adventure movies are a testament to the fact that we're still fascinated by the unknown. The mental health benefits of watching a horror movie can make real-life dangers feel less threatening, and gradually reducing the impact of stressors through exposure to a controlled environment. The mental health benefits of watching a horror movie can make real-life dangers feel less threatening, and gradually reducing the impact of stressors through exposure to a controlled environment.
