It's important to understand the two main bet types in Super Spin Roulette: Straight Bets and Multiplier Bets.

Straight bets are the simplest and most common. They are placed on a single number or a small group of numbers. The payout is based on the odds of the number being hit.

Multiplier bets are more complex and offer higher potential payouts. They are placed on a larger group of numbers, and the payout is multiplied by a certain factor.

There are three main types of multiplier bets: Street Bet, Square Bet, and Corner Bet.

Street Bet: Your chip covers three numbers across the betting grid. There are 12 rows to place bets on. The multiplier payout for a Street Bet is 11:1.

Square Bet: Your chip covers four numbers in a square. There are 16 squares to place bets on. The multiplier payout for a Square Bet is 8:1.

Corner Bet: Your chip covers four numbers in a corner. There are 16 corners to place bets on. The multiplier payout for a Corner Bet is 8:1.

It is important to understand the rules and payouts of each bet type before placing your bets. The roulette table will provide the necessary information.
