<p&gt;Betting on Super Spin Roulette Live&lt;/p&gt;
<p&gt;&lt;/p&gt;
<p&gt;lt s important to understand the two main bets types in Super Spin Roul
ette. Not least 👍 because one type will get the benefit of the multipli
ers and the other type will not.</p&gt;
<p&gt;&lt;/p&gt;
<p&gt;The two bet types are:&lt;/p&gt;
<p&gt;&lt;/p&gt;
<p&gt;Outside &#128077; Bets
                                  These are bets placed on the outside of the b
etting grid. These tend to be the Even Money 👍 bets, like Red/Black, Od
d/Even, High/Low and Column Bets and Dozen bets, which pay 2:1. Inside Bets
ese are individual 👍 numbers or combinations of numbers and have normal
payouts of between 35:1 to 5:1. It is these bets that multipliers 👍 wi
Il be paid on, and also the bets that have their normal payouts reduced (which p) Tj T* BT /I
<p&gt;&lt;/p&gt;
<p&gt;The outside &#128077; bets play as they do on a regular European Roule
tte table, so there is no harm in playing those bets 👍 on the Super Spi
n table, you II get the same return.</p&gt;
<p&gt;&lt;/p&gt;
<p&gt;The implications of playing the Inside bets and the impact the &#128077
; multipliers have on the payouts does need some explanation.</p&gt;
<p&gt;&lt;/p&gt;
<p&gt;Inside Bets&lt;/p&gt;
<p&gt;&lt;/p&gt;
<p&gt;Straight Up Bet
                        This is a bet where your chip covers 👍 one nu
mber on the betting grid. There are thirty-seven numbers to choose from. You can
place as many straight-up bets 👍 as you like. The multiplier payout wi
Il be for the full amount. Payout = Straight-up Bet amount x Multiplier.</p&g
<p&gt;&lt;/p&gt;
<p&gt;Split Bet &#128077;
                              This is a bet where your chip covers two numbers
   so half the amount is on one number 👍 and half on the other. You cov
er two numbers with one bet. The multiplier payout for a Split bet is 👍
half. Payout = Split-Bet amount x multiplier divided by two.</p&gt;
<p&gt;&lt;/p&gt;
<p&gt;Street Bet
                    Your chip covers three numbers across the betting &#128077
; grid. There are 12 rows to place bets on. The multiplier payout for a Steet B
et is a third. Payout 👍 = Street Bet amount x Multiplier divided by thr
ee.</p&qt;
<p&gt;&lt;/p&gt;
<p&gt;Corner/Basket bet
                            This is a bet where you place your chip 👍
on the intersection where 4 numbers meet. Hence the corner. The multiplier payou
t for a Corner bet is a quarter, &#128077: Payout = Corner Bet Amount x multiple
```
