Reactoonz (Play & GO): Review

Reactoonz is a 7x7 cluster pays slot with cascading symbols. Symbols drop down onto the grid to form winning combinations whilst wins are achieved by landing five or more symbols in a connected cluster - horizontally and/or vertically. Winning symbols are removed and new symbols drop in to fill the grid. The game continues to cascade until no new winning combinations can be created.

All wins during a game round contribute to increasing the Quantum Leap charge meters one by one.

When a charge meter is fully charged, one of the following quantum feature is added to the queue randomly:

- Implosion : Transforms 3 to 6 symbols into wild symbols, while also destroying all adjacent symbols
- Alteration : Chooses 1 random one-eyed symbol, and all matching symbols turn into another symbol. In case if there are no one-eyed symbols on the grid, feature can choose any available symbol
- Demolition : Destroys all one-eyed symbols and all matching symbols
- Incision: Cuts a wild symbol into the centre, and creates two intersecting diagonal lines through the grid. Both lines will show the same random symbol.

When all five meters are fully charged, the Gargantoon feature is added to the queue. The Gargantoon first adds a 3x3 wild symbol to the grid in a random position. If no more cascades are possible, it first becomes two 2x2 wild symbols before finally ending up as nine 1x1 wild symbols
