

vaidebet que empresa é essa

<p>TELVM wrote: Yep looks more or less in the ballpark to me, mid way betw
een a Coppermine</p>
<p> and a Tually.</p>
<p>Nice 🌝 scores!</p>
<p>That Coppermine score is a bit too close to the performance</p>
<p> of my Celeron 1400@1635 system for my liking.</p>
<p>But things 🌝 are changing fast over here</p>
<p> 😁</p>
<p>...</p>
<p>...</p>
<p>...</p>
<p>...</p>
<p>Yesterday I got a package I totally had forgot about.</p>
<p>A little more</p>
<p> than a week 🌝 ago I placed a bid on a motherboard and a few C
PUs.</p>
<p>The bid I placed was 10</p>
<p> SKR = 1 🌝 Euro and I did not think I would win but I did.</p>
</p>
<p>The board was not really</p>
<p> anything I thought I 🌝 would use in this kind of build becaus
e it lacks an ISA slot and I</p>
<p> like to have one should 🌝 I ever need it.</p>
<p>I placed a bid on the board because I was</p>
<p> curious and wanted to see how it 🌝 performed.</p>
<p>The board was sold as untested and had dirt</p>
<p> on it. At least I hope it is dirt...</p>
<p>I thought I 🌝 might aswell test the board at once. I</p>
<p> placed a Coppermine P3 933 in the socket and the system posted.</p&
gt;
<p>I 🌝 installed Windows 98</p>
<p> and did some overclocking and performance tests.</p>
<p>I managed to beat my AX6BC + Tualeron</p>
<p> 1400@1400 SuperPi score 🌝 with the Coppermine @ only 1100 mhz
</p>
<p>With the Tualeron 1400 I</p>
<p> managed to improve its overclocked SuperPi score even though 🌝
this board cant beat the</p>
<p> Aopen AX6BC clock for clock.</p>
<p>This will probably be the motherboard I will use in my</p>
<p> 🌝 Windows 98 build for DX7 + DX8 games ¢.</p>
<p>This board does not suffer from any of the</p>
<p> problems my Aopen AX6BC 🌝 shows.</p>
<p>I will also be able to use a P3 1400-S. [FSB > *] seem</p>
<p> to be accurate for these platforms.</p>
<p>This 🌝 board is not a 440BX board as planned but what</p>
</p>
<p> is it?</p>
<p>Who can identify the motherboard?</p>
<p>The Video Card has also 🌝 been changed, at least</p>
<p> for the moment, can someone recognize it?</p>
<p></p>
